

# MOBILE DOCUMENT MANAGEMENT. *SIMPLIFIED.*

SavvyDox combines the disruptive market dynamics of cloud computing and mobile access in a simple-to-use, collaborative, mobile document management system that results in **increased productivity**.

A solution that will have the same dramatic business impact as BlackBerry did on enterprise email.

Now that's  
**REVOLUTIONARY**

### **Simple publishing and review with 100% control.**

Use the tools you already know to distribute documents: Microsoft Word, PowerPoint, PDF. Collect streamlined feedback – no more tracked changes! Comments can be private or public, but the pen stays in your hands.

### **Efficient, personalized reading experience with highlighted changes.**

See what has changed inside the document in seconds instead of sorting through hundreds of pages. Find, organize, and review documents in a way that works for you...fast.

### **Safe, flexible integration.**

Multiple platform support means no one is left out. Be as nimble or secure as you need to be, in the cloud or behind your firewall. Build APIs to connect with your systems and automate processes.

### **Smart tracking on who reads what.**

Collect stats on pages read and time spent on each page for important, time sensitive documents. Get the visibility and analytics you need to enforce compliance and complete audits.

### **Updated documents in real-time pushed to your mobile device anywhere, anytime.**

Open the latest version on your tablet with a few taps instead of spending minutes searching through directories. SavvyDox is cloud enabled allowing you to access the documents you need, anywhere, anytime.
